

2020 Community of Practice Evaluation: Network Executive Directors

Collected in December 2020

The CoP helped Network Members to:

- Provide COVID relief to the community

- Improve CQ strategic planning, operations, and comms

- Raise morale and receive emotional support

- Incorporate racial equity strategies into work

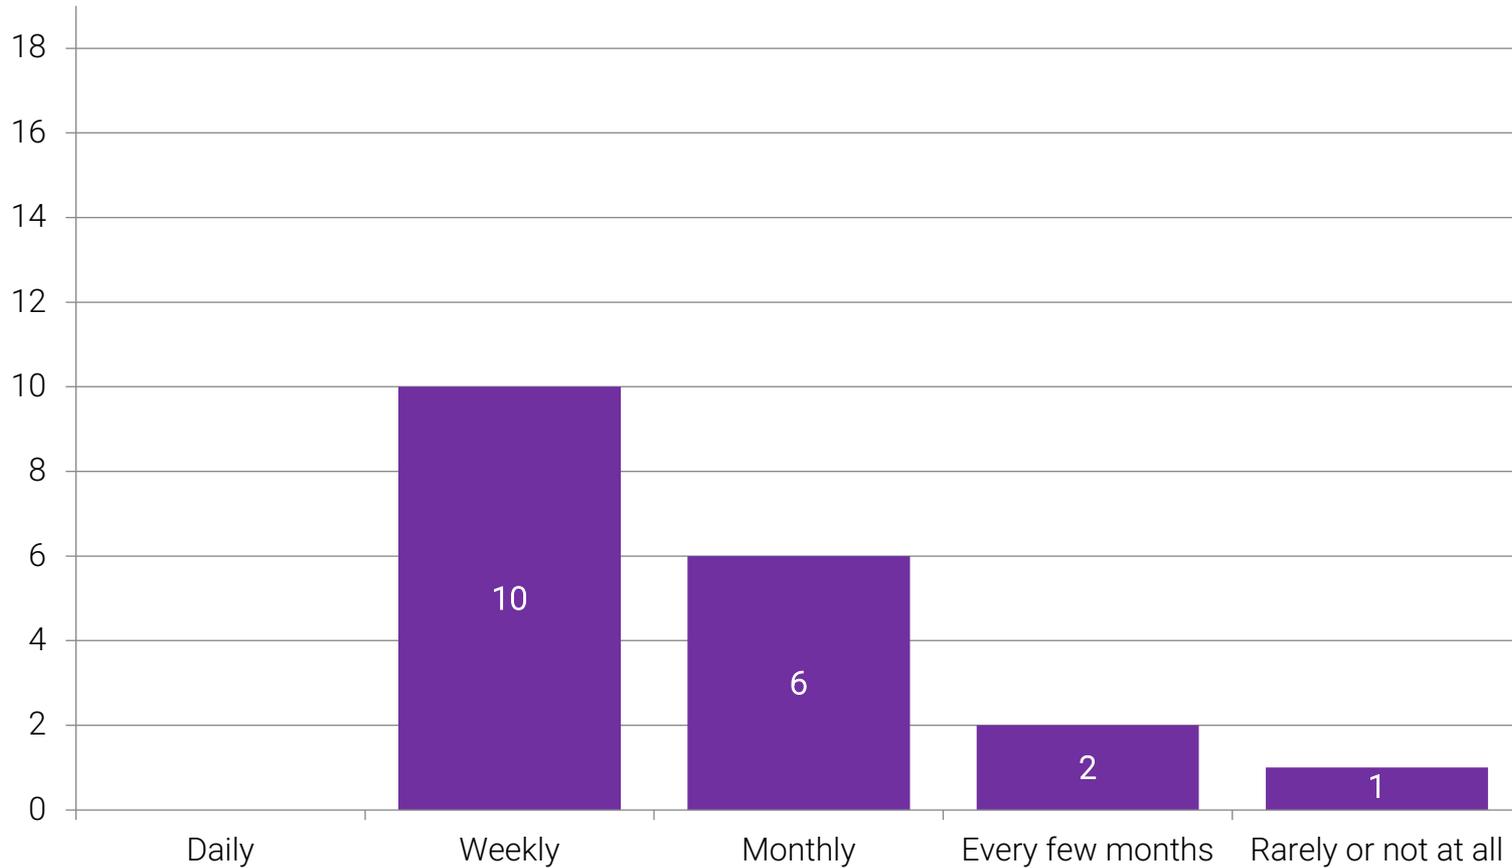

- Create stronger partnerships

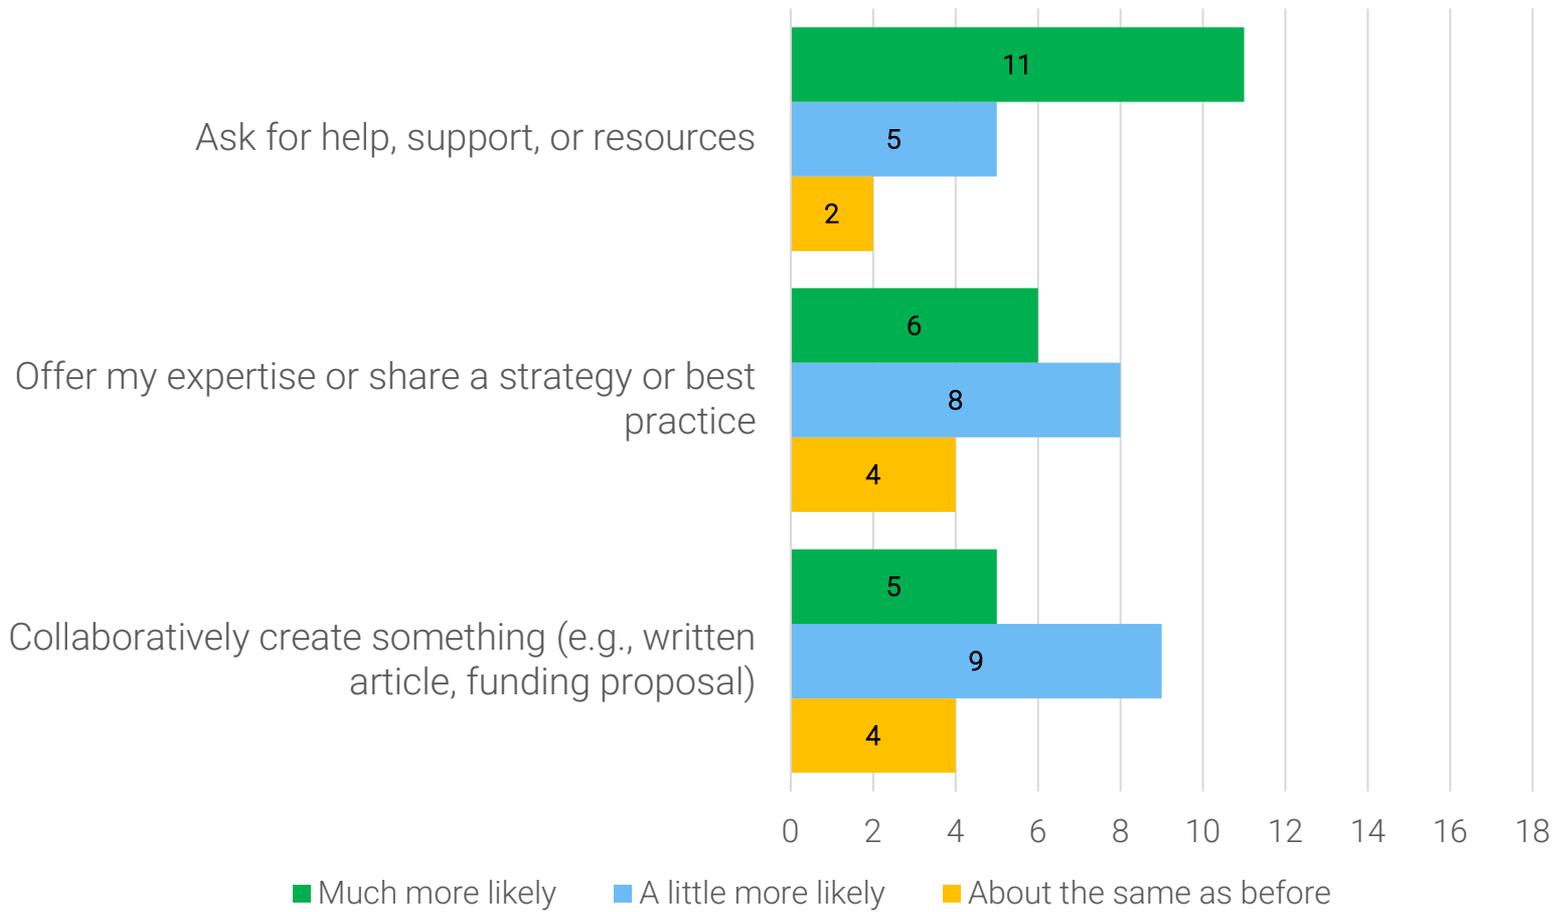

- Expand fundraising opportunities

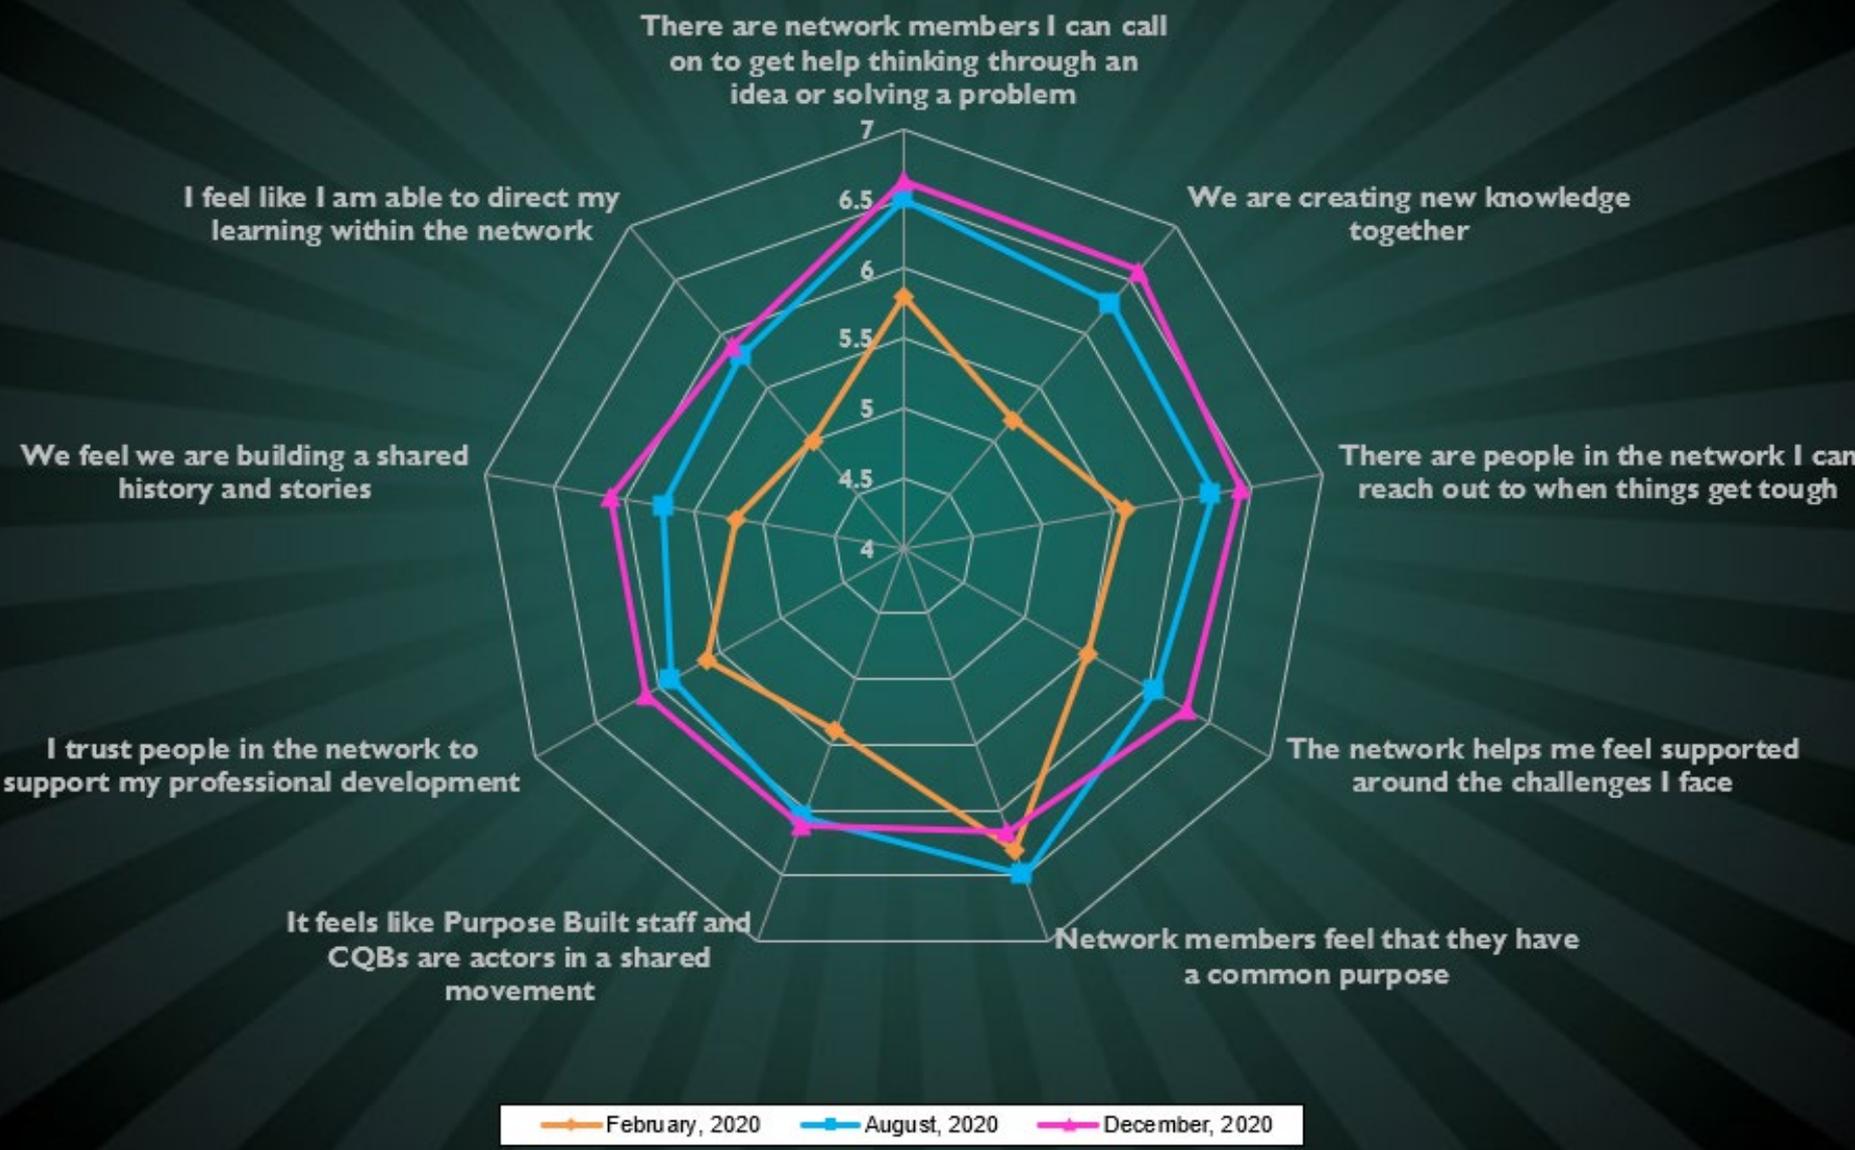

The majority of EDs communicate 1:1 with other Network Members on a weekly or monthly basis.

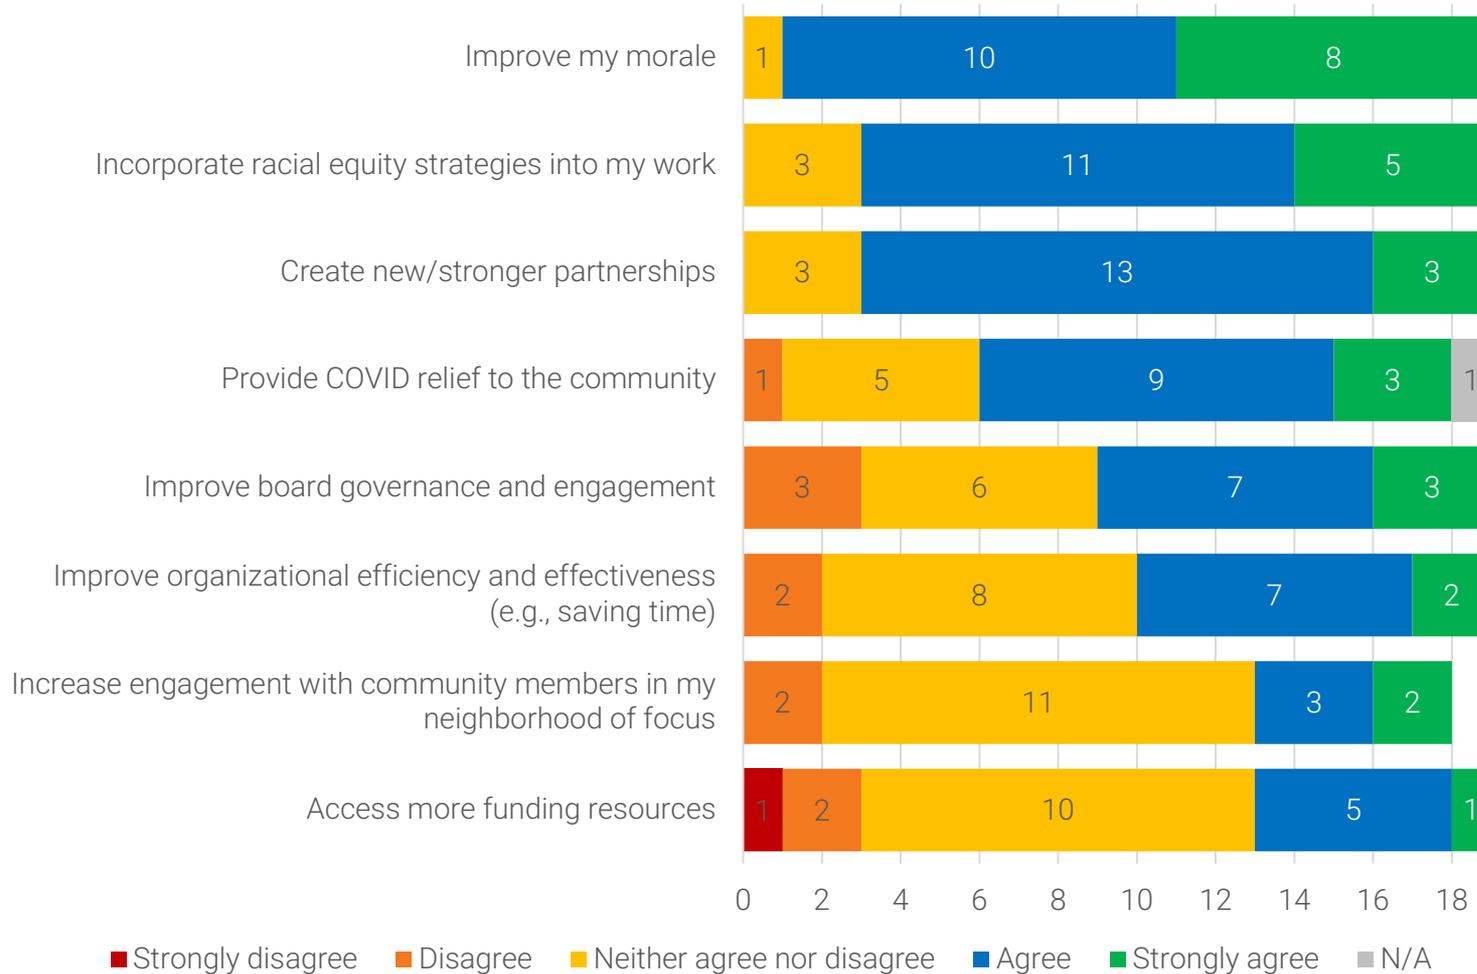

Since the CoP launch, EDs are much more likely to ask for support, and somewhat more likely to offer support and to work collaboratively.

We are becoming a stronger community, and we have room to grow even stronger.

The CoP improves the morale of network members and supports integrating racial equity strategies and building partnerships.

The Community of Practice helps network members keep up to date and learn from each other.
